DETAILED ACTION

Allowable Subject Matter

Claim 31 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

Claims 6-15,27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi et al. See the previous office action for this rejection.

Response to Arguments

Applicant's arguments filed 2/3/06 concerning the rejected claims have been fully considered but they are not persuasive. The amendment to claim 6 is a functional limitation and does not further limit the apparatus. Concerning the feed opening, it is noted that the opening proposed by the examiner in the cover of the patent would allow the patented apparatus to function in the desired manner since it is only necessary to have a small opening. The non-analogous art is not persuasive because the claimed elements are found in the patent and their use is intended use only. Finally, the dependent claims were not argued so that their patentability stands or falls with the parent claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
